

Child Resistant Pouches

Ready to Ship or Custom Print Available

PharmaLoc Zipper

Pouches with a special tab that requires two handed dexterity to open the package. It's easy for adults to open, but extremely difficult for children to do so. Great for all sorts of products, from cleaning "pods" to medical marijuana, and commonly used as exit bags. Perfect for packaging vials & bottles.

As Low As: \$0.67/bag

PN: ZCR122509B - 12.25" x 9" x 4" Black
PN: ZCR122509W - 12.25" x 9" x 4" White

Child-Guard/Push-Pin Zipper

The proven industry standard, used by Tide® for detergent pods. The sliding zipper has a pin that must be inserted to "unlock" contents. This simple but effective zipper can be applied to a wide range of sizes to serve many markets.

As Low As: \$0.58/bag

PN: ZPCR08506BL293C - 8.5" x 6" - Royal Blue
PN: ZPCR08506W - 8.5" x 6" White

Thumb-Pocket Zipper

This ready-to-label pouch has a thumb tab zipper that is easy for adults to open, but nearly impossible for children. No bulky closures or pull-tabs required; just a sophisticated press-to-close zipper that keeps kids out. Great for edibles.

As Low As: \$0.34/bag

PN: ZCR0404125TE - 4.5" x 4.125" - White (Fill Through Bottom)
PN: ZCR0550675TE - 5.5" x 6.75" - White (Fill Through Bottom)
PN: ZCR05506750ZE - 5.5" x 6.75" - White (Fill Past Zipper)

Single Dose

A small pouch for single-dose products and small items. A micro perforation near the corner helps adults tear the package open. Excellent scent and moisture protection.

As Low As: \$0.05/bag

PN: CR03250325TS - 3.5" x 3.5" - Silver
PN: CRW03250325TS - 3.5" x 3.5" White

**All Bags are FDA Approved
Opaque Food Grade Material**

What TYPE of Child-Resistant Bag Do You Need?

Single Dose

- Tamper Evident
- Single Use Child Resistance
- Ideal for: unit doses, i.e. concentrates, cartridges, edibles, etc.

Reclosable Retail Ready

- Tamper Evident
- Reclosable (Multi-Use Child Resistance)
- Ideal for: edibles, beverages, capsules, tinctures, etc.

Exit Bag

- Non-Tamper Evident
- Reclosable (Multiple Products Package)
- Ideal for: dispensaries and delivery services

Compliance laws can be confusing, and there is more than one type of “child-resistant” bag. How do you make sense of it all and ensure that you create a package that will meet your needs? IMPAK breaks it down below.

There are many types of Child Resistant bags, from IMPAK, but ALL fall into these categories: Single Use, Reclosable Retail Ready or Exit Bag.

You need a Single Dose (non-reclosable) Child Resistant bag if...

You are packaging unit dose products, such as concentrates, vape cartridges, unit dose edibles, seeds and topicals. Single-use child-resistant packaging require special effort to get into like scissors or an internal (hidden) tear slit and cannot be re-sealed after the seal is broken.

You need a Retail-Ready Reclosable Child Resistant bag if...

You are packaging multi dose products, such as edibles, beverages, capsules, tinctures, etc. Re-sealable CR bags must preserve their Child Resistant functionality every time you open the package. These type of bags are also tamper evident.

You need a Child Resistant Exit bag if...

You are a dispensary/store front or a delivery service. All products sold must leave the store or be delivered in Exit Bags. These type of bags are NOT tamper evident and should not be used to package product directly in them. All products that go inside an Exit bag must be already individually packed.
